INVITATION

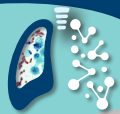

The European Federation of Cytology Societies (EFCS) is announcing the second webinar which is organized by the common efforts of two Cytology Societies, this time by the German and the Spanish Society of Cytology. The program has been planned by Marianne Engels from Cologne in Germany and by Maria Lozano from Pamplona in Spain, who both chair the session.

The main topic of the event is lung cytopathology. Maria Lozano from Spain and Ralf Heine from Germany - two well-known experts in this field - will present their thoughts on biomarkers in cytology and on techniques of FNA in thoracic diseases.

In the second part of the afternoon four younger colleagues - two from Spain and two from Germany - will each give a case presentation from the field of lung cytopathology.
